MIMICWATCH · BRAND IMPERSONATION REPORT

MetaMask

Period: 2026-10-02 to 2026-11-01 (30 days)
Generated 2026-11-01 14:06 UTC
Official: metamask.io, consensys.io

> 0 new high-risk finding(s) not yet on any wallet blocklist (0 domain(s), 0 token(s)), plus 63 phishing domain(s) that wallets already block but that are still online. Draft reports are ready; nothing has been filed.

	CRITICAL	HIGH	MEDIUM	LOW	INFO	Total
Domains	1	62	0	113	4	180
Tokens	0	0	1	14	0	15

Checked: 2538 lookalike permutations (171 registered), 7 hostnames from Certificate Transparency, 4 newly registered domains, 158 pages fetched (40 rendered with screenshots), 126,459 new-pool tokens on base, 764 new-pool tokens on ethereum.

1. Needs a decision: new (critical / high, not on any blocklist yet)

Nothing new at this level in this period.

1b. Still online, already blocked by wallets or the host

MetaMask / ScamSniffer already warn their users about these, or the host shows a phishing warning. The domains still exist, so a registrar takedown is the remaining step.

▶ 63 domain(s)

2. Watch list (medium, or impersonating content without wallet prompts)

LOW **`mstamask.io`** Lookalike, other crypto content 36/100 · lookalike: replacement

- Typosquat (replacement) of the official domain
- Lookalike of your domain serving other crypto content (wallet, web3), ends at https://www.google.com/sorry/index?continue=https://www.google.com/search%3Fq%3D

Recommended: Review: traffic for a lookalike of your name goes to other crypto content (a competitor, an affiliate, or a phishing kit for another brand). Report if it misleads your users.

LOW **metwmask.io** Lookalike, other crypto content 36/100 · lookalike: replacement

- Typosquat (replacement) of the official domain
- Lookalike of your domain serving other crypto content (wallet, web3), ends at https://www.google.com/sorry/index?continue=https://www.google.com/search%3Fq%3D

Recommended: Review: traffic for a lookalike of your name goes to other crypto content (a competitor, an affiliate, or a phishing kit for another brand). Report if it misleads your users.

LOW **consesys.io** Lookalike, other crypto content 35/100 · lookalike: omission

- Typosquat (omission) of the official domain
- Lookalike of your domain serving other crypto content (NFT)

Recommended: Review: traffic for a lookalike of your name goes to other crypto content (a competitor, an affiliate, or a phishing kit for another brand). Report if it misleads your users.

LOW **consensys.online** Lookalike, other crypto content 33/100 · lookalike: tld-swap

- Official name on a different TLD
- Lookalike of your domain serving other crypto content (crypto, tokens, wallet)
- Drainer-style JS: obfuscated-js(346 _0x identifiers)

Recommended: Review: traffic for a lookalike of your name goes to other crypto content (a competitor, an affiliate, or a phishing kit for another brand). Report if it misleads your users.

LOW **consensys.com** Lookalike, other crypto content 31/100 · lookalike: tld-swap

- Official name on a different TLD
- Lookalike of your domain serving other crypto content (Crypto, staking, Web3)

Recommended: Review: traffic for a lookalike of your name goes to other crypto content (a competitor, an affiliate, or a phishing kit for another brand). Report if it misleads your users.

LOW **consensys.net** Lookalike, other crypto content 31/100 · lookalike: tld-swap

- Official name on a different TLD
- Lookalike of your domain serving other crypto content (Crypto, staking, Web3), ends at https://consensys.com/

Recommended: Review: traffic for a lookalike of your name goes to other crypto content (a competitor, an affiliate, or a phishing kit for another brand). Report if it misleads your users.

▶ 15 token(s) on the watch list

3. Everything else we checked (low / info)

Registered lookalikes without a website, parked pages, certificates for unrelated sites, and labelled false positives. Kept so you can see what was ruled out. 4 are explicitly labelled as false positives or brand-owned redirects.

▶ 111 domain(s)

4. Coverage and limits of this scan

- Certificate Transparency (crt.sh): `metamask%` 4695 certs; `metamask.%` 4695 certs; `metamask-%` 89 certs; `%metamask%` 89 certs. crt.sh truncates leading-wildcard searches, so names that only contain the brand in the middle can be missed.
- Newly registered domains (WhoisDS free list, capped at 70k names/day): 2026-10-31: 70000, 2026-10-30: 70000, 2026-10-29: 70000, 2026-10-28: 70000, 2026-10-27: 70000, 2026-10-26: 70000, 2026-10-25: 70000.
- Tokens: base: 30 days of new pools; ethereum: 1.4 days of new pools (3 RPC errors). Only tokens that got a Uniswap/Aerodrome pool are seen. Free Ethereum RPCs serve about a day of logs.
- Wallet blocklists checked: metamask, scamsniffer.
- Not covered yet: X/Twitter, Telegram and Discord impersonators, app stores, paid ads, Solana tokens.
- Scores are heuristics. Every finding above "low" should be looked at by a person before anything is filed.

5. How this was collected

Only public data was read: DNS, certificate logs, public domain lists, public blockchain logs, RDAP, and the public pages themselves (fetched like a normal visitor; no logins, no clicks, no form input, no wallet connected). No suspect was contacted. Nothing in this report has been filed with any registrar, host or blocklist: every report under "Draft" is text for MetaMask to approve. We file only with a signed Letter of Authorisation.
